Subject: Re: Mine Waste Discharges

Hey Tony:

Good to hear from you - its been a while.

I'd enjoy the chance to talk with you - keeping in mind that I may not have all the details at this point - particularly since we have another federal agency involved who tends to be more resistant to change.

I'll plan to call you - or if you get impatient - feel free to call me.

Best,
Greg

Subject: Mine Waste Discharges

Hi Greg. It's been a long time. I've been working with Jan Goldman-Carter and our DC colleagues on issues related to the discharge of mining wastes into water of the U.S. I have a long-standing interest in the issues and NWF is extremely concerned about the Pebble Mine.

Jan was telling me about the meeting last week with Bob Sussman, Pete Silva, and others from EPA and I was really interested in your statements about withdrawing the Regas memo, tightening the waste treatment system exemption, and applying effluent limitations to mine discharges that are currently treated as fill. NWF wants to support EPA and the Corps in any way we can. Can you spare 30 minutes to talk a little more specifically about what you have in mind?

Hope you are doing well and I look forward to hearing from you.
